TROPICAL CYCLONE BULLETIN NR. 14
Typhoon FRANCISCO (MEKKHALA)

Issued at 5:00 AM, 24 June 2026
Valid for broadcast until the next bulletin at 11:00 AM today.

FRANCISCO CONTINUES TO WEAKEN WHILE MOVING NORTHWARD OVER THE PHILIPPINE SEA.

Location of Center (4:00 AM)

The center of Typhoon FRANCISCO was estimated based on all available data at **275 km East of Basco, Batanes (20.3°N, 124.6°E).**

Intensity

Maximum sustained winds of **155 km/h** near the center, gustiness of up to **190 km/h**, and central pressure of **955 hPa.**

Present Movement

Northward at 10 km/h

Extent of Tropical Cyclone Winds

Strong to typhoon-force winds extend outwards up to **360 km** from the center

TROPICAL CYCLONE BULLETIN NR. 14
Typhoon FRANCISCO (MEKKHALA)
Issued at 5:00 AM, 24 June 2026
Valid for broadcast until the next bulletin at 11:00 AM today.

TROPICAL CYCLONE WIND SIGNALS (TCWS) IN EFFECT			
TCWS No.	**Luzon**	**Visayas**	**Mindanao**
1 Wind threat: **Strong winds**	**Batanes and the northeastern portion of Cagayan** (Gonzaga, Santa Ana) **including Babuyan Islands**	-	-
	Warning lead time: **36 hours** Range of wind speeds: **39 to 61 km/h (Beaufort 6 to 7)** Potential impacts of winds: **Minimal to minor threat to life and property**		

OTHER HAZARDS AFFECTING LAND AREAS

Heavy Rainfall Outlook

Refer to **Weather Advisory No. 9 issued at 5:00 AM today** for the heavy rainfall outlook due to Tropical Cyclone FRANCISCO and the Southwest Monsoon.

Severe Winds

The wind signals warn the public of the general wind threat over an area due to the tropical cyclone. Local winds may be slightly stronger/enhanced in coastal and upland/mountainous areas exposed to winds. Winds are less strong in areas sheltered from the prevailing wind direction.

- **Minimal to minor impacts** from strong winds are possible within any of the areas under Wind Signal No. 1.

The Southwest Monsoon and the periphery of FRANCISCO will bring **strong to gale-force gusts** over the following areas (especially in coastal and upland areas exposed to winds):

- **Today:** Most of Luzon, Visayas, Misamis Occidental, Lanao del Norte, Camiguin, Dinagat Islands, Davao Occidental, and Davao Oriental.
- **Tomorrow (25 June):** Most of Luzon, Panay Island, Negros Occidental, and Northern Samar.
- **Friday (26 June):** Batanes, Ilocos Norte, Apayao, Cagayan, Bataan, Bulacan, Metro Manila, CALABARZON, Aurora, Occidental Mindoro, Oriental Mindoro, Romblon, Marinduque, and Bicol Region.

TROPICAL CYCLONE BULLETIN NR. 14
Typhoon FRANCISCO (MEKKHALA)
Issued at 5:00 AM, 24 June 2026
Valid for broadcast until the next bulletin at 11:00 AM today.

HAZARDS AFFECTING COASTAL WATERS

A Gale Warning is in effect over the northern and eastern seaboards of Northern Luzon. For more details, refer to Gale Warning No. 3 issued at 5:00 AM today.

24-Hour Sea Condition Outlook

Up to very rough seas over the following coastal waters:

- **Up to 4.5 m:** The eastern seaboards of Batanes and Babuyan Islands; the northeastern seaboard of mainland Cagayan**.**
- **Sea travel is risky for all types or tonnage of vessels. All mariners must remain in port or, if underway, seek shelter or safe harbor as soon as possible until winds and waves subside.**

Up to rough seas over the following coastal waters:

- **Up to 3.5 m:** The remaining seaboards of Batanes and Babuyan Islands.
- **Up to 3.0 m:** The remaining seaboard of mainland Cagayan
- **Mariners of small seacrafts, including all types of motorbancas, are advised not to venture out to sea under these conditions, especially if inexperienced or operating ill-equipped vessels.**

Up to moderate seas over the following coastal waters:

- **Up to 2.5 m:** The seaboards of Isabela and Aurora; the northern seaboard of Ilocos Norte; the northern and eastern seaboards of Polillo Islands and Catanduanes; the northern seaboards of Camarines Norte and Camarines Sur.
- **Up to 2.0 m:** The seaboards of northern Quezon and Kalayaan Islands; the northern and eastern seaboards of Northern Samar; the eastern seaboards of Albay, Sorsogon, Eastern Samar, Dinagat Islands, Surigao del Sur, and Davao Oriental; the western and southern seaboards of mainland Palawan.
- **Mariners of motorbancas and similarly sized vessels are advised to take precautionary measures while venturing out to sea and, if possible, avoid navigation under these conditions.**

Other coastal waters have forecast wave heights of less than 2.0 m.

TRACK AND INTENSITY OUTLOOK

- **It must be emphasized that heavy rainfall and severe winds may still be experienced in localities outside the forecast confidence cone. Refer to "Other Hazards affecting Land Areas" for more details. Furthermore, the track may still shift within the limit of the forecast confidence cone.**
- This tropical cyclone will remain far from the Philippine landmass. FRANCISCO will continue moving northward until tomorrow (25 June) morning before turning north northeastward towards the Ryukyu Islands and sea south of mainland Japan. On the track forecast, FRANCISCO will exit the Philippine Area of Responsibility (PAR) by tomorrow evening or Friday (26 June) morning.
- FRANCISCO is forecast to gradually weaken throughout the forecast period. Nevertheless, it will likely remain a typhoon while inside the PAR region.

Considering these developments, the public and disaster risk reduction and management offices concerned are advised to take all necessary measures to protect life and property. Persons living in areas identified to be highly or very highly susceptible to these hazards are advised to follow evacuation and other instructions from local officials. **For heavy rainfall warnings, thunderstorm/rainfall advisories, and other severe weather information specific to your area, please monitor products issued by your local PAGASA Regional Services Division.**

The next tropical cyclone bulletin will be issued at 11:00 AM today.
